

# System Options

## REST Whirlpool System

Discover the Rest™, a silent whirlpool massage system option that recycles the energy of the pump to transfer heat to the water all the while using less energy. The Rest whirlpool system is offered on selected bathtubs equipped with Hydromax or Hydrofeel massage systems.

### Features and benefits

- Combine the benefits of design and technology into one with the Hydromax or Hydrofeel Rest option. This added value option offers a silent whirlpool solution that maximizes your comfort in peace and quiet by recycling the energy of the pump to transfer heat to the water.
- No need to add hot water – the Rest **recycles the energy** of the pump to transfer heat to the water, maximizing comfort & cost savings.
- Consumes **350 watts less than regular whirlpool systems** – go green!
- Control the intensity of your Rest whirlpool massage with **silent air switches**, creating the perfect customized experience.

### Comparison of levels of noise (dB)

Note: For every five-decibel increase, the intensity of sound perceived doubles.

### How much quieter is the Hydromax or Hydrofeel Rest?

This revolutionary system is **66% quieter** than the average whirlpool pump. A traditional whirlpool pump runs at the same sound decibel as a car engine. Hydromax or Hydrofeel Rest—is as quiet as the sounds in nature. Imagine the possibilities...

#### What are the benefits?

Silence. Noise is an undeniable source of stress and a moment of silence can renew physical and mental balance, allowing the body to find the proper rhythm of breathing and heartbeat. Give yourself a few moments of silence with a Hydromax or Hydrofeel Rest massage session. Let it be the escape that revitalizes you for the coming day. **Let the design of your bathtub speak for itself, without being overshadowed by a loud whirlpool pump.** Discover complete serenity with the Hydromax or Hydrofeel Rest—a quiet massage system option.
