Thermo-Acoustic

For MAAX Collection bathtubs and tub showers

Yet another MAAX exclusive, the Thermo-Acoustic noise reduction system keeps you in the comfort zone. **This avant-garde concept minimizes ambient noise and vibration associated with other massage features.** By keeping noise to a minimum, your every hydrotherapy session remains the peaceful, enjoyable experience you've been longing for.

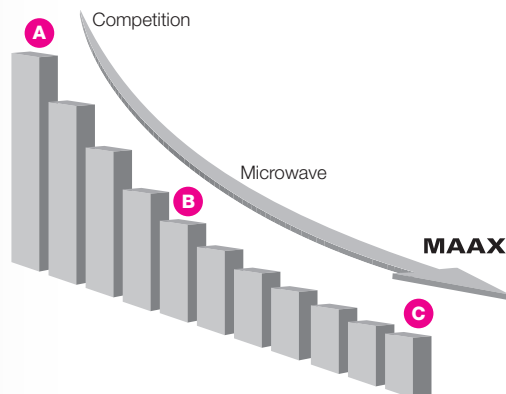

A two-in-one accomplishment

The concept developed by MAAX consists of enveloping the tub shell with a membrane that insulates acoustically and thermally. In addition, the layer of Neutra-Phone beneath the tub lifts it off the floor and eliminates vibrations that could otherwise be felt throughout the house or building.

Fits drop-in and alcove (with or without apron) installations. For bathtubs and tub showers.

Efficient noise reduction
